

BIOGRAPHY

Larry Leach,
President
Advanced Projects, Inc.

Larry Leach is the president of Advanced Projects, Inc. (API). Larry worked at the Vice President level in several Fortune 500 companies. He has Masters' Degrees in both Business Management and Mechanical Engineering. He was awarded membership in Tau Beta Pi, the Engineering honorary society, while earning his undergraduate degree in Engineering at Stevens Institute of Technology. He works at improving project delivery success in government and industry, deploying Critical Chain Project Management (CCPM). Project success improvements include cutting project times in half, improving scope, schedule, and cost performance to near 100%, and doubling project productivity.

Larry has published many papers on related topics, most recently a PM Journal article in June 2003. He presents seminars for PMI Seminars, and authored the book, *Critical Chain Project Management*, released in its second edition in December, 2004. He teaches graduate level management courses for the University of Phoenix. Larry is certified as a Project Management Professional (PMP) by the Project Management Institute, and a sought after speaker at PMI conferences and for global project management training.
